has successfully completed a course on Hamoye

Data Engineering: Setting Up
Kubernetes ID: 11e9258815c1f000

Grade: **70.0%** School: **OneSchool**

The world of data engineering is one of utmost importance as the knowledge of a data engineer is required to build tools, infrastructure, workflows and services that are necessary for data processes. In this course, you will learn how to set up Kubernetes - a vital tool for building reliable infrastructure for data, especially one that is portable, extensible, open-source and can manage containerized workloads and services.
